Through the activities of Radioactive Waste Management (RWM) Group in the Forum for Nuclear Cooperation in Asia (FNCA), we could complete the book of “The Consolidated Report on Radioactive Waste Management in FNCA Countries”. The purpose of this report is not only a mutual understanding on RWM in FNCA countries but also a correspondence to the Joint Convention on Spent Fuel Safe Management and Radioactive Waste Safe Management (Joint Convention) in IAEA. The recent activities on the field of RWM in this region are well summarized. The authors believe the reference of this book will cause further improvements of radioactive waste managing level in FNCA countries.

The renewal of this report will be done based on the agreement through the discussion in Workshop of RWM-FNCA. These most up-to-date information will be released in the Web-site of FNCA: <http://www.fnca.jp/english>).

Voluntary works did the making up and editing of this text under the agreement of Workshop RWM-FNCA. We would like to appreciate Ms. Eulinia M. Valdezco, the Philippines for the efforts of text review.
